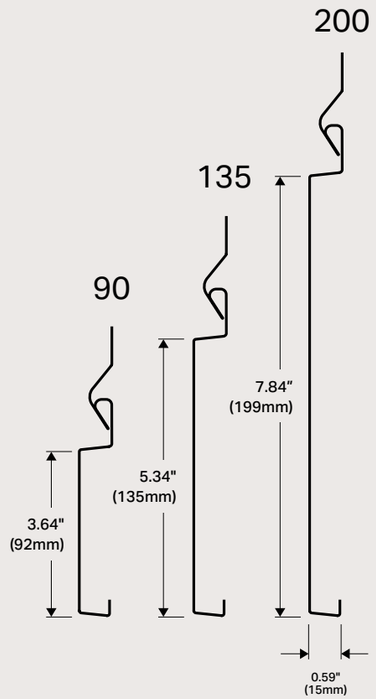
Available in two gauges and multiple widths that can be installed together, Bellara Plank blends seamlessly to look beautiful for generations.

Bellara Steel Siding

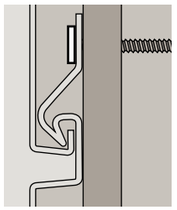


Multi-Width
Multiple planks sizes can be installed together in any configuration, giving homeowners and designers the flexibility to play with pattern and repetition.

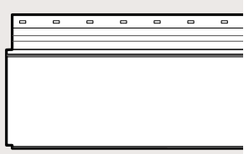
Technical Specs

Fastening System	**Hidden**
Gauge(s)	**24, 26GA**
Panel Coverage	**3.64" (92mm)**
	5.34" (135mm)
	7.84" (199mm)
Panel Length	**12'**
Application	**Wall**
Profile Depth	**0.59" (15mm)**

Locked-in Beauty
Bellara planks feature a 5/8-inch thick profile that locks in place to reveal a ¼ inch channel, which completes the illusion of fully dimensional wooden boards.

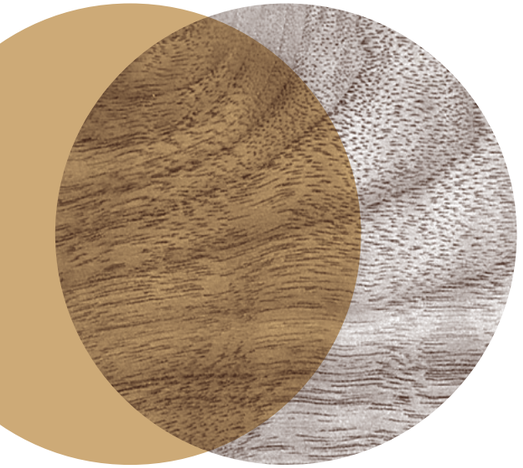


Hidden Fastening System
Bellara fasteners are hidden as well as engineered to be secured tightly to the building's fascia and won't pop out like nails do over time.



Seamless Fit
An extended edge allows panels to fit seamlessly behind overlapping panels, preventing unsightly gaps from appearing as the building expands and contracts and eliminating the need for transition trims and butt joints.

Perforated Soffit
7.0 in^2/ft^2
Plank 135 is available with perforations and can be combined with solid planks to achieve proper airflow.



Ultra-High
Resolution

Hyper-Realistic Detail

The process for creating Bellara woodgrain patterns starts at the lumber mill, where we search for rare woods with elegant grains and rustic boards that have a beautifully aged patina. Ultra-high-resolution imaging captures the intricacies of all the grains and knots.

The granular details within each wood grain are digitally composited over 5 unique plank designs per package. Once perfected, these images are etched onto copper rollers at 16,000 dots per inch, reproducing every nuance in the woodgrain. They are then painted onto the steel using state-of-the-art coil coating technology combined with the world's best PVDF paints to lock in the wood's natural beauty for generations.

Natural Variation
Bellara woodgrain patterns come in five unique faces, which shuffle to provide all the variation seen in nature.

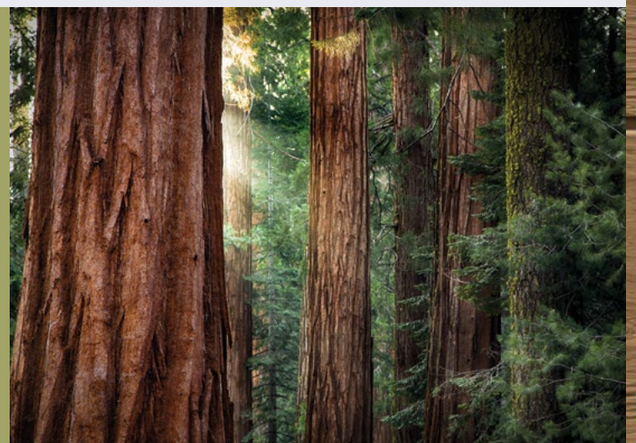
Right: Plank 90, 135, 200, Warm Rosewood

Bridging Natural and Built Environments

Bellara supports biophilic designs that provide an emotional and physiological connection to nature. Studies are linking spaces that take advantage of this biophilic design practice to improving health and wellness outcomes because they both engage and relax the mind.



Bellara Steel Siding

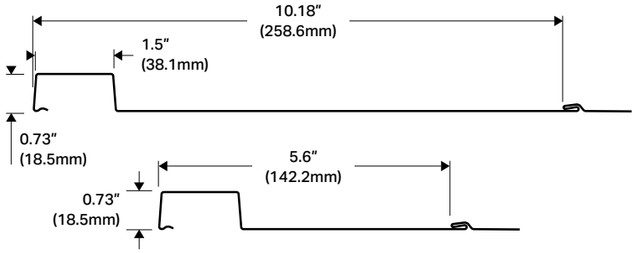
Board & Batten 260, Graphite

Board & Batten 140 | 260

Add a touch of traditional warmth and rustic character to any home that lasts decades. Bellara's resistance to warping, cracking, and shrinking adds to its longevity.

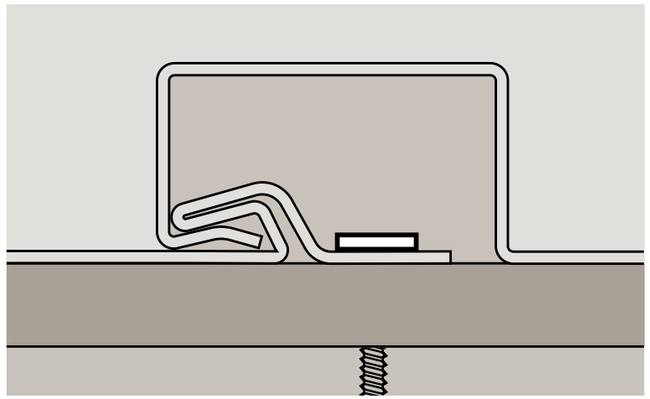
Bellara Steel Siding

Board & Batten 260, Graphite



Technical Specs

Fastening System	**Hidden**
Gauge(s)	**26GA**
Panel Coverage	**5.6" (142.2mm)**
	10.18" (258.6mm)
Panel Length	**12'**
Application	**Wall**
Profile Depth	**0.73" (18.5mm)**



Hidden Fastening System
Board & Batten fasteners are hidden as well as engineered to be secured tightly to the building's fascia and won't pop out like nails do over time.

Spacing Options
Bellara Board & Batten comes in two sizes, providing the option to have tighter or more widely spaced battens.

Lap Siding 155, Graphite

Lap Siding 155

Featuring horizontal panels that overlap, Bellara lap siding creates a seamless appearance. Hidden fasteners allow the panel to expand and contract freely for added durability.

Protection You Can Count On

SHERWIN-WILLIAMS. Coil Coatings

Fade Resistant

State-of-the-art Coating
Bellara's coating is manufactured by Sherwin-Williams and includes Kynar 70% PVDF; Polyvinyl fluoride resin and FEVE. This combination is durable and colour-fast, meaning Bellara colours and patterns will not fade over time, and they are environmentally friendly with no VOCs.

24 & 26 Gauge

Galvanized Steel Construction
Because Bellara panels are made from galvanized steel, they offer long-term protection from rust. Unlike painted siding, Bellara panels won't flake from UV exposure.

Expressence – Architectural Print Series

Our PVDF and SMP coating systems allow us to recreate the look of natural materials through an ultra high-resolution overprint that is rolled onto the coil, capturing all the nuances of natural wood grain.

Signature Matte – SMP Coated Metal

Our Signature Matte colours incorporate resin that is specifically intended to create a textured surface, scattering light and eliminating the steel's glossy appearance.

Signature – SMP Coated Metal

Signature colours offer durable uniform coverage in a wide variety of hues and shades.

Easy Install

ProKut Kit

UKUT8

While cutting Bellara Steel Siding can be done using traditional tools, we've developed a custom cutter to make installation even easier.

- Cut all Bellara profiles including Plank 90, 135, and 200, Board & Batten 140 and 260, and Lap Siding 155
- Kit includes 4 different blades
- Assembly required
- Available nationally

Comparing Steel

When measured up against other building materials, there's no comparison to steel for combining durability, sustainability and aesthetic quality.

Steel

- Sustainable
- Recyclable
- Long lifespan
- Comprehensive warranty
- High quality finishes and patterns
- Easy install

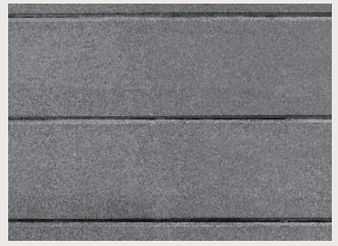
Bellara Steel Siding

Wood

- Warps and rots
- High maintenance
- Combustible
- Labour intensive
- Expands and contracts

Vinyl

- Colour fades
- Expands and contracts
- Combustible
- Can melt with hot temperatures
- Low impact resistance
- Lower aesthetic value



Fiber Cement

- Labour intensive
- Requires safety equipment
- Requires additional finishing
- Not resistant to moisture
- High maintenance
- Heavy to ship and install

Aluminum

- Lower impact resistance
- More expensive
- Clip installation may be required

Composite

- More expensive
- Colour fades
- Combustible
- Expands and contracts

vicwest

WE ARE PLANET PASSIONATE

While Vicwest has always been passionate about building durable and sustainable products, we're equally passionate about producing them in the most environmentally responsible way. This is how we're building for tomorrow.

Carbon

Emissions Reduction

We are aiming to achieve net-zero carbon in our manufacturing operations and have committed to a 90% absolute reduction in scope 1 & 2 GHG emissions by 2030. We are also encouraging our primary supply partners to meet a 50% reduction in carbon intensity by 2030.

Target

- 90% reduction in scope 1&2 GHG emissions by 2030

Circularity

Zero Waste to Landfill

In 2023, we sent 81 tons of waste to landfill, a reduction of 39 tons, by introducing new waste collection streams which included recycling plastics and composting organics. Moving forward, we have set a goal to divert 100% of our waste away from landfills.

Target

- Zero waste to landfill by 2030

Energy

Building with Solar

We've completed Phase 2 of solar PV installation at our Stratford plant, making our total solar panel count 1200. This generates 584kWP, or 86% of our energy requirements. In Acheson, our 504 solar panels generate 94% of the energy required.

Target

- By 2030: 60% of our total energy requirements generated from direct renewable energy (Solar PV & Hydropower)

Water

Rainwater Harvesting

We are strategically harvesting rainwater for use in our facilities to eliminate the use of fresh water from non-potable fixtures. Excess water is made available to the local community for irrigating farms and gardens.

Target

- Harvest a combined 1,000,000 litres of water annually across Vicwest's facilities
